

TechPulse

Week 4 — Complete Web Development Project

Developer	Gaurav Kumar
Project	TechPulse — Technology News & Blog Website
Technologies	HTML5 · CSS3 · JavaScript (ES6)
Deployment	GitHub Pages
Repository	Gauravkumar2510 / TechPulse-News

1. Project Description

TechPulse is a responsive multi-page technology news and blog website created as a Week 4 web development project. It covers Artificial Intelligence, Web Development, Cybersecurity and Gadgets, with interactive article cards, search, category filtering, responsive navigation, newsletter interaction, contact form validation and article detail modals.

2. Pages & Structure

index.html	Home, latest stories, profile photo, search, filters and newsletter.
about.html	About and mission page.
services.html	Technology categories.
contact.html	Contact form with validation and Formspree.
css/style.css	Responsive styling and layout.
js/script.js	Navigation, filters, search, forms and article modal.

3. Features Implemented

- Fully responsive mobile-first design.
- Four connected HTML pages.
- Seven technology articles.
- Search and category filtering.
- Clickable articles with detailed popup modal.
- Mobile navigation.
- Contact form validation with Formspree.
- Newsletter validation and toast feedback.
- GitHub Pages deployment.

4. Setup Instructions

Open the project in VS Code or another editor. Open index.html directly in a browser or use VS Code Live Server. Keep css/style.css and js/script.js in their respective folders. The contact page uses the configured Formspree endpoint. GitHub Pages can be enabled from the repository settings for deployment.

5. Project Links

Live Website: <https://gauravkumar2510.github.io/TechPulse-News/>

GitHub Repository: <https://github.com/Gauravkumar2510/TechPulse-News>

6. Screenshots & Testing Evidence

Interactive Article 7 detail popup — confirms article modal functionality.

TechPulse GitHub repository structure — confirms project files and GitHub Pages deployment.

7. Testing Checklist

Responsive layout	Mobile viewport	PASS
Navigation	All main pages connected	PASS
Search	Keyword search	PASS
Category filters	AI / Web / Security / Gadgets	PASS
Article modal	Open and close details	PASS
Contact form	Validation + Formspree	PASS
Profile image	Repository image loads	PASS
GitHub Pages	Public deployment	PASS

8. Conclusion

TechPulse fulfills the core Week 4 requirements through multiple HTML pages, responsive CSS, JavaScript interactivity, form validation, image optimization, navigation, documentation and GitHub Pages hosting. The project is ready for submission.
